Howard R. Levine Center for Education
915 Pearl Park Way

Weapons Screening Program

What to Expect

- **Screening at All Public Entrances:** Everyone entering The Howard R. Levine Center for Education building at The Pearl through designated public entry points will pass through a weapons-detection scanner. Specific screening stations will be present at the entry level in the Forum and at the entrance from the Assembly to the Center for Education via the Connector.
- **Fast, Contactless Process:** The weapons detection technology enables a quick walkthrough process, minimizing delays and keeping lines moving smoothly.
- **Support Staff on Site:** Trained Public Safety team members will be present to assist, answer questions and provide guidance.
- **Prohibited Items:** As always, weapons and other restricted items are not permitted on campus. The entry procedures help us better enforce these policies.
- **Efficient Passthrough:** Specific items such as laptops, umbrellas, hard eyeglass cases and iPads are likely to set off the weapons-detection system. For efficient passthrough, consider holding these items in your hand versus keeping them in your bag as you proceed through the screening station.
